Mammal Characteristics**

# Digital Pages

The animal writing sheets and passages are now available in Google Slides format.

To open each set of science practice pages, click on the link below after reading these instructions. These links will open Google Slides.

## What you need:

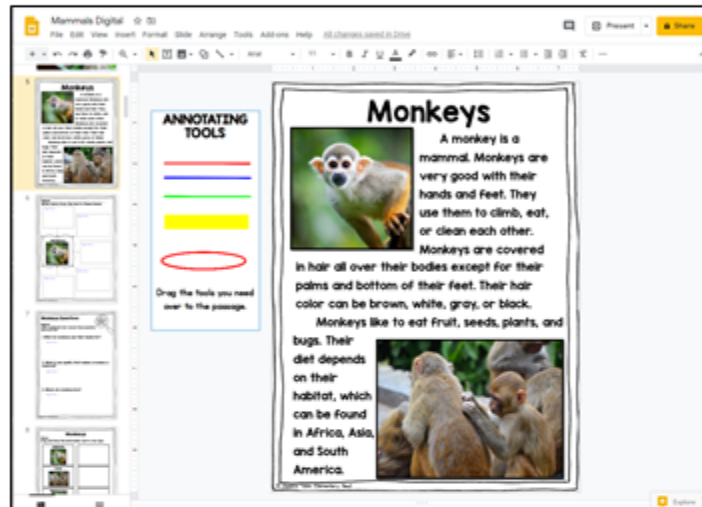

-A Google Classroom account

## What to do:

- Open document using link on this page.
- Click "make a copy". This will be your master copy. Name it whatever you'd like.
- Make another copy to share with your students. Get the shareable link using the 'Share' button in the top right corner.

## Options for sharing:

- Copy the *specific slide* you need and share it with your students.
- Share the *entire presentation* for them to fill out by a certain date or for use when they are reading independently.
- Create a graphic organizer folder for your students to access whichever ones they want/need.

**CLICK HERE FOR DIGITAL ACCESS.**

# Individual Animals

Cheetahs

Name: \_\_\_\_\_

Habitat

Food

Cheetahs are different from other cats because they are the fastest animal.

This animal can be found in the grasslands of Africa.

Cheetahs can run up to 70 miles per hour, making them the fastest animal.

Cheetahs are a cat that has spots. It is a spotted cat and it has a long tail.

## Cheetahs

Cheetahs are very famous mammals. This is because they are one of the fastest mammals in the

world, running up to 70 miles per hour. A cheetah is in the cat family. They walk on all four paws. They have a unique spotted pattern of fur. They have a long tail that helps balance them when they run fast.

Cheetahs are so fast because they are great hunters. They are better animals in their habitat. Cheetahs live in African grasslands. They are endangered because of their beautiful fur.
