Individual Animals

Crocodiles

Name: _____

Habitat

Food

Flip Books

A crocodile has a long body. Its head is rather small compared to its tail.

A crocodile can be found in tropical areas in Asia, America, Australia, and Africa.

They can eat anything in the water.

They eat mammals, fish. They are dangerous predators.

Crocodiles

Crocodiles are an example of a reptile. They are very similar to an alligator, but crocodiles have a longer and pointier head than an alligator.

These animals have

long bodies with four short legs and a long tail. Its jaws are very strong and can eat a lot of food.

in Africa, Asia, and Australia.

It eats fish, birds, mammals, and other reptiles. They can even eat their prey while swimming underwater.
